¹Interact is the flagship conference promoted by the IFIP Technical Committee 13 on Human–Computer Interaction. IFIP is the international federation for information processing. The conference is held every two years.

²The ACM IHM conference follows a very rigorous reviewing process, comparable to ACM CHI

³The ACM CHI conference is one of the top publication venues (among all conferences and journals), thanks to its rigorous review process, its low acceptance rate, its visibility and its large number of attendees.

I addressed a **large panel of students**, from 1st year to Master students, studying various domains like economics, computer science, design, architecture or IT for health.

I taught a **wide range of topics**, from Human-Computer Interaction, HTML/CSS, Javascript, Arduino, C, Databases and ACCESS to Microsoft and Open office.

My role ranged from assistant lecturer to coordinator of the course. I was involved in designing courses and their support materials, evaluations and grading. In 2019-2021, I was the **head of the “Ubiquitous Interaction Systems” specialization at the Master of Science in Informatics at Grenoble**. Since 2021, I am the **head of the “Human and digital world interactions: robotics, augmented and virtual reality, perception (HDWI)” specialization at the Master of Science in Informatics at Grenoble**.

I also followed a teacher training program for 16.5 days during my doctoral studies.
